

Ilhan Klisura

Software Engineer

✉ work@ilhanklisura.com 📍 Sarajevo, BA, Bosnia & Herzegovina

Summary

Experienced in building scalable enterprise and SaaS web applications using C#/.NET, React, Vue.js + TypeScript and SQL databases (SQL Server, PostgreSQL). Skilled in clean architecture, REST APIs, CI/CD pipelines (Jenkins, GitHub Actions) and AI integrations using tools such as LLaMA, OpenAI, Anthropic, Gemini, ElevenLabs, Coqui TTS and n8n. Currently exploring Golang, Python and AI technologies while continuously improving system performance and user experience.

Experience

Medior Software Engineer

Sep 2024 - Present

[Orbicode d.o.o.](#)

Sarajevo, BA, Bosnia & Herzegovina

- Led development of large-scale enterprise modules in regulated environments, covering backend, frontend, and database architecture.
- Designed and optimized complex SQL reporting and analytics solutions using Microsoft reporting tools.
- Engineed advanced HR and workflow systems with strict business-rule validation and approval flows.
- Built mobile-first components, improving usability and cross-device consistency across internal platforms.
- Developed secure backend integrations with external systems for automated data exchange and validation.
- Improved financial and asset-management features, including tracking mechanisms and enhanced reporting security.
- Contributed to architectural decisions, performance optimization, and secure system design.
- Mentored junior engineers and interns in full-stack and clean architecture practices.

Currently focused on AI Systems Development (Hybrid: On-Premise + Cloud):

- Integrating AI-powered document analysis, structured data extraction, and decision-support features into enterprise systems.
- Designing hybrid AI architecture combining self-hosted LLM infrastructure (containerized deployments) with cloud AI providers.
- Building RAG pipelines and embedding-based semantic search for controlled, source-grounded AI outputs.
- Implementing scalable AI service layers in .NET for provider-agnostic model integration.
- Exploring AI voice and speech solutions for conversational automation.

Junior Software Engineer

Sep 2023 - Sep 2024

[Orbicode d.o.o.](#)

Sarajevo, BA, Bosnia & Herzegovina

- Contributed to development of enterprise management systems (backend + frontend).
- Developed and optimized SQL queries and database operations across multiple modules.
- Built responsive UI components with focus on mobile-first design.
- Assisted in backend-frontend integrations for workflow automation features.
- Participated in QA, testing complex reporting and tracking functionalities.
- Collaborated closely with senior engineers in code reviews and architecture discussions.

Software Developer Internship

Aug 2023 - Sep 2023

[BH Telecom](#)

Sarajevo, BA, Bosnia & Herzegovina

Completed internship to fulfill academic requirements for university certification.

- Assisted in backend and frontend development tasks.
- Participated in API integration and database query development.
- Gained insight into software design, enterprise systems, and agile methodologies.

IT Administrator & Web Developer

"IPI" - Institut za privredni inženjering d.o.o. Zenica

Jan 2021 - May 2023
Zenica, BA, Bosnia & Herzegovina

Performed dual role as IT Administrator and Web Developer.

- Managed and maintained internal IT infrastructure, troubleshooting hardware and network issues.
- Developed and maintained the company's WordPress-based website, ensuring performance optimization and SEO compliance.
- Provided ongoing website updates, bug fixes, and content management.

Education

Information Technology (Software Engineering) - Bachelor's Degree

International BURCH University

2021 - 2025 Sarajevo, Bosnia and Herzegovina

Skills

C# (.NET)	Advanced	Golang	Intermediate	TypeScript	Advanced
SQL	Advanced	Python	Proficient	Artificial Intelligence (AI)	Advanced

Languages

Bosnian	Native	English	Native	German	Elementary
Turkish	Elementary				

Certifications

AI Engineer Core Track: LLM Engineering, RAG, QLoRA, Agents,
The AI Engineer Course: Complete, AI Engineer Bootcamp,
Docker & Kubernetes: The Practical Guide,
Mastering Linux: The Comprehensive Guide,
Cisco CCNA 200-301 – The Complete Guide to Getting Certified.

Accomplishments

Honor for outstanding performance,
BOSEPO 2019: 3rd Place Medal,
Attended ROBOTEX 2019 Competition.

Interests

Hobbies: Travelling, Martial Arts, Hiking, Swimming and Skiing.
Interests: Startup Business, Entrepreneurship and Politics.
